

CSC, Inc., operating as Medford Fabrication, has conducted business since the mid-1940's and offers a diverse range of design, metal fabrication, assembly, installation and finishing services.

FACILITIES

Over 120,000 square feet of fabrication facilities located on 11 acres. Bridge crane capacities up to twin – 10 tons x 23' 0" under-hook x 75' 0" wide.

ENGINEERING

Manufacturing engineering utilizing AutoCAD, SmartCam, Columbus Working Model and Visual Analysis 3.50.C.

CERTIFICATIONS

Drug Free Workplace; AWS qualified procedures with AWS Certified Welding Inspectors; AISC conventional and complex steel building structures and sophisticated paint endorsement – enclosed. ANSI/ASQC Standard Q9002-1994 Quality System, Mechanical and Structural PE, State of Oregon.

Licensed contractor in the states of Oregon and California.

CAPABILITIES

Cutting	CNC auto feed, miter band sawing and abrasive shape cutting
Shearing	Capacity to $5/8$ " x 12' 0"
Burning	CNC multi-head standard and fine plasma and gas. Up to 6" thick x 17' 0" x 27' 0"
Forming	Air bending up to 750 tons x 16' 0". CNC controlled.
Punching	CNC Whitney punch/plasma. Ironworkers.
Drilling	Production drilling up to 20" column x 6' 0" reach radial drill.
Rolling	Structural rolling and Plate rolling up to $3/4$ " x 8' 0" or 2" x 3' 0"
Machining	CNC lathe and machining centers, horizontal boring machines up to 6" spindle, and traditional machining equipment.
Welding	All types: GTAW, GMAW, FCAW, SMAW and manual carbon arc and plasma weld preparation.
Shot Blast	20' 0" x 20' 0" x 50' 0" enclosed blast room and Jet Carousel Rotary Blast center.
Finishing	Two (2) large paint booths with heated make-up air and an outfitting building.
Cranes	15 and 18 ton hydraulic truck mounted cranes.
Erection	Fully equipped field installation service trucks.
Delivery	Medium and Heavy Haul Tractors and Trailers.
Materials	Stainless, aluminum, carbon steel, glass, composites and plastics.
